## Travel documents

A valid Polish passport or identity card can be used to travel from the UK to Poland.

If you do not have a valid passport or identity card the following documents may help to get a document which will allow you to return to Poland:

- Expired passport or id card or copies of those documents
- · Original birth certificate
- Other documents indicating Polish nationality, e.g. marriage certificate, parents' birth certificates or passports

#### Return

If you are willing to return and want to ensure that you are returned to Poland as soon as possible you can:

- · Contact your caseworker at the Home Office to say that you are willing to return;
- Make every effort to find supporting documentation for issuing of travel documents;
- Make contact with the Polish Embassy to begin the process of obtaining a travel document.

You may find it useful to read the information below to begin preparing for your return.

## **Documentation in Poland**

Every Polish citizen over 18 who is resident in Poland must have an Identity Card issued by the local administration. If you do not currently have a valid identity card you should get one as soon as possible after arrival by applying to the local administration in the area where you are living.

## **Accommodation**

If you are unable to stay with family or friends you may be able to find temporary emergency accommodation through one of the organisations listed in the Directory.

## Health

Poland has a state healthcare system financed through the National Health Fund (NFZ). If you are not employed and are not in receipt of social security benefits you may need to make voluntary payments if you wish to use health services. To access health services, including substance misuse services, you need a PESEL number (social security number), to check you are entitled to free health services, and an identity document such as an identification card, passport or driving license. If, for any reason you do not have a PESEL number you can apply for one through the local administration in the area where you are living. Some of the organisations listed in the directory may be able to assist with some basic health care services.

## **Emergency support**

Poland has a social security system but payment of unemployment benefit is dependent upon having worked (either in Poland or another EU country) at least 365 days in the last 18 months.

If you would have been entitled to a contributions based benefit in the UK (based on having paid enough National Insurance contributions over a number of tax years) then you should be able to claim the relevant benefit from the UK through the Polish social security system.
